**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Information Disclosure Statement***

The prior art listed the Foreign Patent Documents and Other Prior Art-Non Patent Literature Documents sections of Form PTO-1449 (6 pages) of Information Disclosure Statement (IDS) dated 10 December 2003 have not been considered. Although the Applicant indicated that copies of said documents have been submitted in parent Application Number 10/434,384, only the U.S. documents were found after a diligent search. The Applicant is invited to submit any documents he wishes to be reviewed by the Examiner for full consideration.

### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3653

Claim 81 is rejected under 35 U.S.C. 102(b) as being anticipated by Patent Number 4,092,990 by Bayne. The vibratory coin feeder disclosed by Bayne incorporates hopper 12, platform 20 and hole 19 that read on the Applicant's input region, vibrating coin feeder and coin discriminator, respectively. Regarding the Applicant's coin discriminator, said hole 19 of Bayne acts as a discriminator by allowing properly sized coins to pass through it while "larger coins simply are left on the table and never dispensed" (column 5, lines 26 plus).

### ***Allowable Subject Matter***

Claims 46-80 and 85-100 are allowed. Claims 82-84 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The following related art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number US 6,401,010 B1 by Takahashi because of its main control section 1,

Patent Number 5,699,328 by Ishizaki et al because of its CPU 54,

Patent Number 5,055,657 by Miller et al because of its central computer 16, and

Patent Number 4,059,122 by Kinoshita because of its sorting devices 5.
